

TEAM CONSULTING

CORPORATE PROFILE

"We Are Greater Than Me"

The Firm

Founded in 2004, TEAM Consulting is a management consulting and advisory practice headquartered in Harare, Zimbabwe. For over two decades, the firm has partnered with organisations across financial services, construction, health, agriculture, entertainment, and international development to deliver transformation that endures.

The practice operates on an associate model: tailored engagement teams assembled from a network of specialists across strategy, process, culture, governance, technology, and wellness. The structure affords the integration of a larger firm with the responsiveness of a focused boutique.

OUR FOUNDATION & VALUES

TEAM Consulting is a faith-rooted practice. The firm holds that effective advisory begins with character: wisdom over expediency, service over self-interest, significance over commercial success. This conviction shapes every engagement and drives the firm's sustained investment in community. Four values (the four strands) govern the firm:

SEEK FIRST

Establishing our foundation through humility and spiritual grounding

SERVE DILIGENTLY

Expanding our reach to clients, colleagues, and the community.

STEWARD WISELY

Operational rigor across Resources, Relationships, and Results

STAND FIRM

Principled conduct in Truth, Trust, and Transparency.

OUR APPROACH

TEAM Consulting is transitioning its foundational brand theme as we look toward the future. We are moving our payoff line from "Unlocking Quantum Leap Value" to "We Are Greater Than Me". This reflects a deliberate strategic shift from focusing purely on the magnitude of change to emphasizing the synergy of collaboration.

We believe that excellence is a collaborative journey, both within our internal team or in partnership with our clients. This transition highlights our commitment to building organizations that are more capable than the sum of their individual parts.

"We Are Greater Than Me"

THE FIRM'S DELIVERY APPROACH

The firm's delivery follows a three-phase cycle:

- **Find the Value.** Discovery and diagnostics. Quantify the return. Establish what is at stake.
- **Get the Value.** Execution. Process redesign, technology deployment, change management; bridging strategy and operational reality.
- **Keep the Value.** Sustainability. Embed new practices through training, governance, and performance frameworks. This is where most engagements fail. For TEAM Consulting, it is non-negotiable.

TRANSPARENCY AS A METHOD

The firm practises vulnerability-based consulting: the willingness to name difficult issues candidly, to ask the questions others avoid, and to transfer tools and methods so Clients can sustain the work independently. This is not a philosophy of comfort. It is a philosophy of trust.

What we Deliver

The firm delivers integrated, outcome-oriented solutions; not standalone products. Every engagement is scoped against seven measurable outcomes:

G	Growth	Expansion of revenue, market share, and strategic reach through disciplined planning and execution.
R	Resilience	Structural and operational fortification against shocks is critical in Zimbabwe’s dynamic operating environment.
E	Efficiency	Systematic elimination of waste. Measurable improvement in resource utilisation and throughput.
A	Agility	The capacity to pivot decisively when markets, regulations, or competitors shift.
T	Thrivability	Long-term Organizational health: regenerating people, processes, and competitive advantage continuously.
E	Engagement	A workforce aligned with purpose, producing discretionary effort and reduced attrition.
R	Results	Quantifiable impact across financial and operational indicators. The ultimate accountability measure.

Every engagement begins with a GREATER diagnostic: a structured assessment of the Client’s position across all seven dimensions. It surfaces gaps, identifies quick wins, and provides the basis for a precisely scoped solution.

Our Capabilities

Most consulting firms offer a catalogue of services. TEAM Consulting offers an integrated practice; disciplines that connect, reinforce, and build upon one another so that Clients engage a single advisory partner across the full arc of transformation.

A strategy engagement, for instance, does not end with a document. It flows into Organizational design, culture alignment, and change management. A process reengineering initiative identifies inefficiencies, redesigns workflows, and, where the opportunity warrants it, progresses into robotic process automation to sustain and scale the gains. Each discipline is available individually, but the firm's distinctive strength lies in assembling them as tailored, multi-disciplinary solutions.

Strategy & Organisation

- Strategy Development & Facilitation
- Organizational Development
- Governance & Board Advisory
- Performance Management

Process & Technology

- Business Process Reengineering
- Robotic Process Automation (RPA)
- Technology-Enabled Transformation

People & Culture

- Culture Transformation
- Change Management
- Team Building & Facilitation
- Training & Capacity Building
- Wellness & Executive Coaching
- Recruitment & Talent Advisory
