TEAM CONSULTING

The Firm

Founded in 2004, TEAM Advisory Services is a management consulting and advisory firm operating as a **network** across Zimbabwe, Zambia and Namibia, with engagements delivered in more than seventeen industries across Africa. For over two decades the firm has partnered with organisations from financial services and mining to the public sector and development agencies.

The practice operates as a network rather than an office. Engagement teams are assembled Client by Client from associates and specialist partners across strategy, process, culture, governance, technology and wellness — drawn from wherever the right capability sits. Clients deal with a single accountable advisory partner while drawing on the depth of a far larger firm, with the responsiveness of a focused boutique.

WHAT WE DELIVER

Seven outcomes, measured.

The firm delivers integrated, outcome-oriented solutions — not standalone products. Every engagement, in every market we serve, is scoped against seven measurable outcomes:

G	**Growth**	Expansion of revenue, market share and strategic reach through disciplined planning and execution.
R	**Resilience**	Structural and operational fortification against shocks — critical in the dynamic operating environments of the markets we serve.
E	**Efficiency**	Systematic elimination of waste. Measurable improvement in resource utilisation and throughput.
A	**Agility**	The capacity to pivot decisively when markets, regulations or competitors shift.
T	**Thrivability**	Long-term organisational health: regenerating people, processes and competitive advantage continuously.
E	**Engagement**	A workforce aligned with purpose, producing discretionary effort and reduced attrition.
R	**Results**	Quantifiable impact across financial and operational indicators. The ultimate accountability measure.

Every engagement begins with a GREATER diagnostic: a structured assessment of the Client's position across all seven dimensions. It surfaces gaps, identifies quick wins and provides the basis for a precisely scoped solution.

OUR CAPABILITIES

One practice, not a catalogue.

Most consulting firms offer a catalogue of services. TEAM Advisory Services offers an integrated practice — disciplines that connect, reinforce and build upon one another, so Clients engage a single advisory partner across the full arc of transformation.

A strategy engagement does not end with a document. It flows into organisational design, culture alignment and change management. A process reengineering initiative identifies inefficiencies, redesigns workflows and, where the opportunity warrants it, progresses into robotic process automation. Each discipline is available on its own — the firm's strength lies in assembling them.

Strategy & Governance	• Strategy Development & Facilitation • Policy and Reform • Governance & Board Advisory • Performance Management
Process & Technology	• Business Process Reengineering • Robotic Process Automation (RPA) • Technology-Enabled Transformation
People & Culture	• Culture Transformation • Engagement • Change Management • Organisation Development • Team Building & Facilitation • Training & Capacity Building • Wellness & Executive Coaching • Recruitment & Talent Advisory

TEAM CONSULTING

HOW WE WORK

Find it. Get it. Keep it.

Delivery follows a three-phase cycle. Most firms stop after the second phase. For TEAM Advisory Services the third is non-negotiable — it is where value is either embedded or lost.

01

Find the Value

Discovery and diagnostics. Quantify the return. Establish what is at stake before a single recommendation is made.

02

Get the Value

Execution. Process redesign, technology deployment and change management — bridging strategy and operational reality.

03

Keep the Value

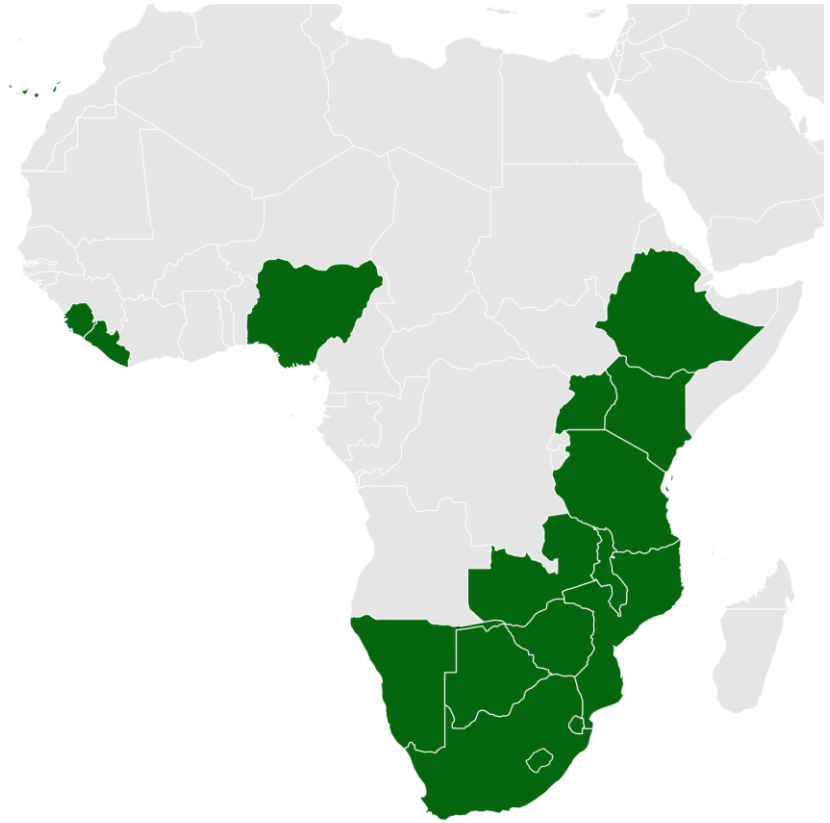

Sustainability. New practices embedded through training, governance and performance frameworks. This is where most engagements fail.

Transparency as a method.

The firm practises vulnerability-based consulting: naming difficult issues candidly, asking the questions others avoid, and transferring tools and methods so Clients can sustain the work independently. Not a philosophy of comfort — a philosophy of trust.

INDUSTRIES SERVED

17+ industries served across Sub-Saharan Africa.

HOME MARKETS

Zimbabwe, Zambia and Namibia

AFRICAN REACH

3 regions

Southern, East and West Africa

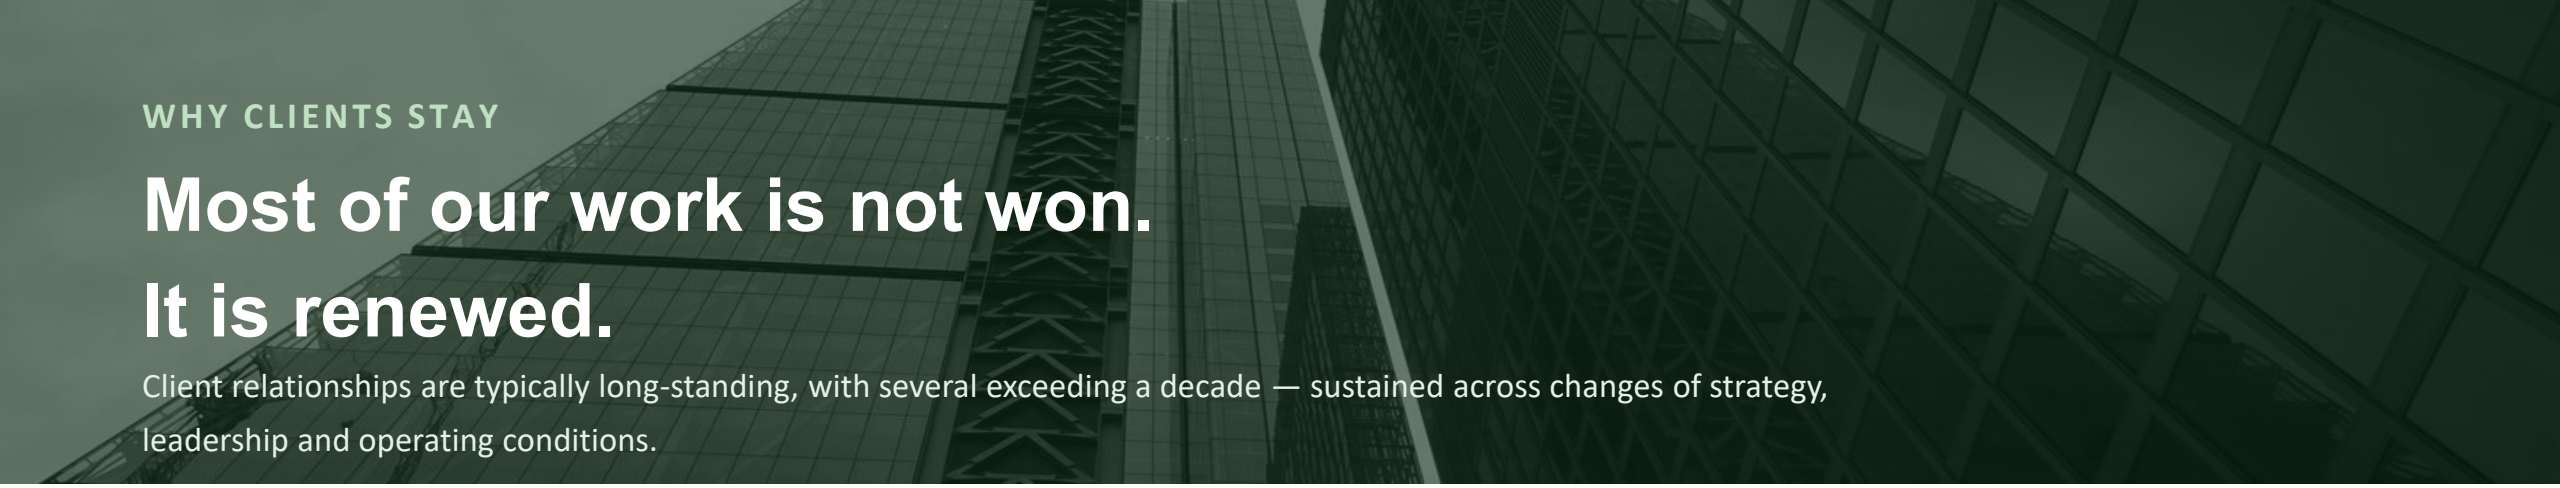

Engagement teams are assembled from a pool of expert associates, which is why the map keeps growing. The firm does not open an office to enter a market; it brings the network.

INDUSTRIES WE SERVE

Multiple industries. One method.

Two decades of engagements across the sectors below. The industry changes; the discipline does not.

- Financial Services (Banking, Insurance, Microfinance and Asset Management)
- Public Sector and Local Government
- Manufacturing (Consumer Goods and Industrial Products)
- Mining, Energy, Oil and Gas
- Health and Pharmaceuticals
- Development Agencies and NGOs
- Retail
- Tourism and Hospitality
- Education and Training
- Information, Communications and Technology
- Automotive and Logistics
- Construction and Real Estate
- Agriculture
- Sports, Media and Entertainment
- Professional Services and Independent Representative Bodies

WHY CLIENTS STAY

Most of our work is not won. It is renewed.

Client relationships are typically long-standing, with several exceeding a decade — sustained across changes of strategy, leadership and operating conditions.

80%+ of the firm's work comes from repeat Clients and referrals — the only measure of advisory quality that cannot be written into a proposal.

01

We stay for the third phase

Most firms leave once execution ends. Keep the Value is where new practice is embedded — and it is where the firm is still in the room.

02

One partner, start to finish

Engagements are led personally by the Managing Consultant. No rotating team, no quiet handover to juniors once the work is won.

03

We say the difficult thing

Vulnerability-based consulting means naming the issue others avoid, and asking the question the room is avoiding.

04

We hand over the tools

Methods, frameworks and governance are transferred deliberately. The measure of a finished engagement is the Client's independence.

LEADERSHIP & NETWORK

Each Client has one lead partner, supported by a network of 25+ associates.

Dr. Eric Zinyengere

Managing Consultant

Experience 23 years in consulting; 25 years of overall professional experience.

Qualifications PhD Organisational Leadership; MSc Strategic Management; BSc (Hons) Applied Mathematics; Certified Management Consultant (SA); Certified KPI Professional (UAE).

Specialisation Strategy, governance, policy and reform, business design, process, coaching and implementation.

The network model

Rather than carry a fixed bench in every market, the firm draws on a standing network of 25+ consultants, associates and specialist partners. Teams are assembled for the engagement.

- One accountable advisory partner, wherever the work sits.
- Strategy, process, culture, governance, technology and wellness under one roof.
- Local market knowledge paired with internationally tested methods.

"We Are Greater Than Me" — the network is the practice.

TEAM CONSULTING

OUR FOUNDATION

Character before counsel.

Effective advisory begins with character: wisdom over expediency, service over self-interest, significance over commercial success. TEAM Advisory Services is a faith-rooted practice, and that conviction shapes every engagement and sustains the firm's investment in community.

Four values — the four strands — govern the firm and every associate who works under its name.

SEEK FIRST

Pursue understanding before prescribing solutions.

SERVE DILIGENTLY

Embrace change and continuously seek innovative solutions.

STEWARD WISELY

Guard resources, relationships and results with disciplined custodianship.

STAND FIRM

Uphold truth, trust and transparency. Always.
